

Wildfire

Invisible Clear Color Paints

Fluorescent Pigmented Water Base Polyurethane

Originally developed for the scenic studios of Hollywood, to create dramatic visual effects for film television and amusement parks Wildfire brand paint and coating products have become the standard of quality for the visual effects professional. For brilliance, coverage, ease of application and true color balance, the only choice is Wildfire.

Features:

- Supersaturated pigmentation provides the most powerful luminescence available
- Exclusive clear color formulations that react brilliantly to black light
- Artist quality 100% acrylic polyurethane base retains binder and opacity when mixed with water
- Ideal for a wide range of surfaces, including muslin, fabrics, plastic, metal and wood
- Dries in one hour to a smooth satin finish that is water resistant and flexible
