

VioStorm Trias Firmware Version 2.1 Release Notes

Trias firmware version 2.1 changes the fan PWM control signal to work with Mechatronics model G6015X12B1+6-RGR-3086 fans as opposed to Aavid Thermalloy model PSAD16010BHMF00 fans all other functions remain the same.

Trias version 2.1 can only be installed in VioStorm Series model VS-120 fixtures with serial numbers ending in 1201 and up and VioStorm Series model VS-60 fixtures with serial numbers ending in 0449 and up. VioStorm VS-120 and VS-60 fixtures with serial numbers prior to these must use firmware version 2.0.
